

REMOVE ODORS FROM YOUR HOME

Available Throughout the Greater Tampa Bay Area – ODER FREE AIR

POV Home Watch offers a service designed to [remove odors from your home](#) through the use of an ozone generator machine. The same machine used by used by hotels, restaurants, casinos, fitness centers and commercial kitchens. Should you have an unpleasant odor in your home, condo, basement, rental property, RV, boat or car, or just need that "new car smell," our **ODOR FREE AIR** service can help.

Smoking | Kitchen and Food | Pet | Mold | Mildew | Must

EASY INSTALLATION AND OPERATION

- POV Home Watch will deliver and set-up an ozone generator.
- A standard power outlet is all that is needed.
- The treated area must be closed-off and contained.
- It must be vacant of people, pets and plants.
- Timers are used and based on severity of odor:
 - Small areas can be treated in a 4-6 hour period.
 - Larger areas are treated over-night.
- The space must be vented for two hours after the treatment.
- POV Home watch will remove the device when the process is complete.

"Your home will be left smelling fresh and clean"

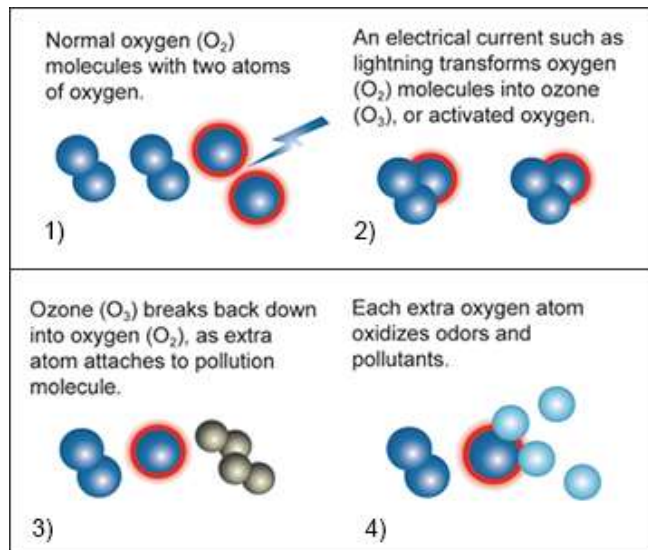

Large homes are treated by setting up the ozone machine in proximity to your HVAC return air duct and the HVAC fan set to ON which will circulate the treated air throughout the home. During this time ceiling fans should be turned on, cabinet & closet doors opened and all window treatments opened to maximize exposure to the ozonized O3 generated air.

Depending on the severity of the odor such as pet odors and built-up cigarette smoke accumulated over years, the treatment time may need to be expanded and the process repeated for larger areas. Cigarette smoke is difficult to remove because there are multiple pollutants which are saturated throughout the home, duct work, carpeting and in window treatments.

HOW IT WORKS

The use of an ozone generator is a powerful odor treatment method and does not use chemicals or masking deodorizers. The device uses electrical current and a special process which converts normal air into ozone. During the process oxygen (O_2) is transformed to activated oxygen also known as O_3 or ozone.

O_3 is the sanitizing cleaning ingredient and the product of the ozone generating machine. It sanitizes by breaking down odors, microorganisms and other pollutants at their source similar to nature's way of eliminating odors and microorganisms through the use of UV sunlight and ozonated air. The clean air you smell after a thunderstorm. With the completion of your service any unused O_3 eventually reverts back to O_2 in about an hour leaving the air fresh and clean because the source of the odor has been removed.

ABOUT POV Home Watch: A wide variety of [services](#) are offered to residential homeowners, insurance companies, realtors and lending institutions. The Company performs on-site property visits to include monitoring reports on behalf of the seasonal and vacant homeowner confirming the property is secure and is being maintained. As the advocate for the absentee homeowner, POV Home Watch verifies the condition of your property, takes proactive steps with the homeowner to minimize potential problems and assists with emergency repairs while you are away. POV Home Watch is an Accredited Member of the Florida Home Watch Association ([FHWA](#)).

Ozone Machine Customer Testimonials

We use ozone generators when a hotel room has smoke odors, and the Odor Free eliminates them in short order. The hotel staff really appreciates this particular ozone generator because it is simple to operate and so easy to maintain. I am transferring to another Hilton property in about eight weeks and will be placing another order with Odor Free to eliminate hotel room odor there.

Bill Simmons, Hilton Garden Inn, Winston-Salem, NC

I am a realtor and also manage rental property. We purchased the Odor Free to eliminate odors in the condominiums we rent near the University of Tennessee. It is amazing how effective the unit is at getting rid of smoke odor, pet odor, and just about anything else! I recently sold a 4,200 square foot home that had a stale, musty odor that actually came from underneath. All it took was one day in the house and one day in the crawl space, and odor was gone. All things being equal, a property that smells fresh sells a lot faster.

Dick Brower, Realty Executives, Knoxville, TN

My two field dogs are also pets and spend most of their time in my office. Sometimes they are wet after taking them out for a run, and their sleeping pillows accumulate dog odor. After running the Odor Free for four or five hours the first time, the dog odor was basically eliminated. Now I set the timer for about 30 minutes when I take them out, and the office maintains a fresh smell. It really works and I recommend it for anyone that keeps field dogs inside.

Bob Watson, Toms River, NJ

The Odor Free works fantastic! Our cat sometimes feels the need to mark its territory. We tried all kinds of deodorizers and products that were supposed to get rid of pet odors, but were never satisfied. We found that the Odor Free does not mask the odors, it destroys them. We tell all our friends with house pets about it.

Duane Thompson, Harpers Ferry, VA

We use the Odor Free on car odors at the dealership every day. It removes any pet or smoking odors after we detail the car. For a fairly new vehicle, a 10 to 20 minute ozone treatment will get it back to smelling like a new car again. On a used car with a strong smoke smell, we may need to run it for a couple of hours or more. When the odor is gone we put the car out on the lot for sale.

Andre Coyne, Maher Chevrolet, St. Petersburg, FL

The basement in our house developed a damp and musty smell. The Odor Free got rid of the smell and now we can enjoy using our basement again. I didn't know that ozone generators could be so effective on mold until a friend told me about them. We also run the Odor Free upstairs on occasion to keep the main part of the house smelling fresh and clean. Great service from the company too!

Forrest Deets, Port Ewen, NY

Our trucking company has a fleet of tractor-trailers with sleeper cabs. The odors in the cab really build up after being operated by the same driver for a long time. There are not only food and body odors, but the cabs are often smoked in as well. When a driver moves out, we clean up the truck and then fumigate with the Odor Free. This ozone generator does just what we wanted it for, and our new driver gets a clean smelling cab. A couple of our drivers have taken it home to get rid of odors and make their house smell better. If anybody wants to know how well it works tell them to give me a call.

Taylor McCuiston, Miller Transports, Inc., Pryor, OK

Rooms in our extended-stay facility regularly build up odors from pets and smokers. They also have kitchenettes so cooking odors are an issue too. The Odor Free takes care of just about any odor problem that is left behind by our guests. We recently used the ozone generator to get rid of the smell of marijuana in one of the rooms and it worked great!

Larry Croom, Candlewood Suites, Meridian, ID

We manage two low income housing units that often have smoke odor and cooking odors that can be difficult to get rid of. The Odor Free really works and makes cleanup a lot easier when an apartment turns over. We find it very effective on the bathroom odor as well. I even carried it home to treat an antique hutch that was purchased from a smoker, and it promptly took care of that smoke odor too.

Deb Davis, Subsidized Housing Manager, Fort Dodge, IA

We service and maintain shuttle and tour buses in the Vancouver area. They build up odors from food, beverages, body sweat -- you name it. The Odor Free is perfect for getting rid of these. Sometimes people bring back fish on the bus from trips to the coast and the ozone generator eliminates that smell as well. I loaned it to an employee who had bought a car that someone had passed away in, and it removed that odor also. We highly recommend the Odor Free generator to anyone in the business of cleaning up vehicles.

Joseph Lazar, BrightHouse Fleet Services, Inc., Richmond, British Columbia

There was a fire in one of our cabins recently. The Odor Free really did away with the lingering smoke smell. The cabins also develop a musty odor at times. After we treat a unit with the ozone generator the musty smell is totally gone, and the next guest is much happier. The product lived up to claims and we couldn't be more pleased!

David Hotel, Pine Ridge Campground, Roebuck, SC

The Odor Free is great for removing odors after a smoker or a tenant with pets leaves us. It normally takes about one day to remove the smoke odor and a little longer to remove the pet smell. We even had a deceased tenant that was only discovered until a week later. After three days of ozone treatment the Odor Free had totally removed all the odors.

Susan Saenz, Heritage Park Apartments, Denison, TX

We have apartments and often deal with pet and tobacco odors when people move out. The Odor Free gets rid of these odors and a fresh smelling place is easier to rent. I also use it at home because my son is allergic to mold. One part of our house holds moisture and it has really helped with his allergies.

Bruce Schilling, Milwaukee, WI
